CHERRY HILL NURSERIES

T. C. THURLOW'S SONS, Inc.

WEST NEWBURY, MASSACHUSETTS

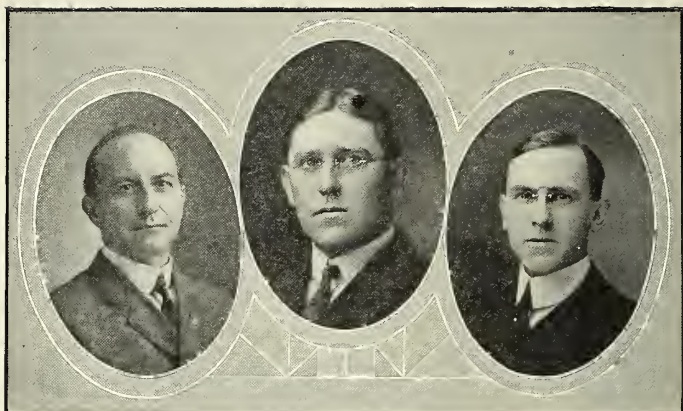

ESTABLISHED 1832

OUR NURSERIES are located midway between Haverhill and Newburyport on strong, fertile land which, aided by an abundance of moisture, well-distributed, enables us to grow thrifty vigorous stock well adapted to our rugged **New England Climate.**

We are $2\frac{1}{2}$ miles from the Byfield Steam Depot and Dummer Academy-Georgetown Electric Railroad, and $1\frac{1}{2}$ miles from the West Newbury Electric Railroad.

Visitors are gladly welcomed any day except Sunday

George C. Thurlow, President.
David C. Stranger, V. President. Winthrop H. Thurlow, Treasurer.

THE CHERRY HILL NURSERIES

Had their inception nearly a century ago when George Thurlow, the Grandfather, began budding Apple trees for his own use and then for sale to his neighbors. The business has continued in the family ever since. Thus you will see we are "NURSERY BORN."

From that small beginning the stock has been increased from year to year whenever those in charge saw an opportunity to secure plants or trees that would be a distinct benefit to the trade.

Many thousands of dollars and much effort have been spent in trying to procure the best obtainable, and we honestly believe that our assortment of rare and choice Peonies is second to none in the entire world. Our Iris, Phlox and other perennials embrace the choicest and best of those adapted to New England planting.

We have never tried to see how many trees and shrubs we could grow, but have made a consistent effort to have all our stock of a grade and quality suitable for the most particular person.

PRICES. The prices herein are for the stock here at our nurseries. Delivery to railroad station is free. Boxing and baling, however, are charged at cost.

Large specimen trees and stock desired in the shortest possible time many times may be delivered anywhere within a radius of 150 miles by horse team or truck, and often at a cost not exceeding that of boxing and freight. This will enable stock to be dug and planted the same day when desired.

We endeavor to furnish nursery stock just as represented, and take particular pains to dig all plants with excellent root systems and to so pack them that they will be protected from exposure while in transit. We cannot control the planting, care of stock, weather condition, etc., however, and, therefore, cannot warrant plants to live.

EVERGREEN TREES

Our evergreens are transplanted every two or three years, which enables us to lift them with a fine, fibrous root-system which readily holds a suitable ball of earth. We carefully burlap the roots with the earth adhering, as we believe this the most satisfactory way to pack and ship evergreens. It is the custom of many to make a charge for this burlaping, but we feel that the trees are not complete without it and, therefore, include this service in the price of the tree.
